SUMMARY

UI/UX Designer, front-end developer creating polished, user-centered interfaces in Figma and building component-based design systems with auto-layout and design tokens. I design end-to-end: from user research and transparent interface patterns to scalable systems. I work pragmatically, making clear design decisions, owning them, and improving based on feedback. My recent work focuses on AI product experiences, designing systems where users understand how AI recommendations are made. I code my designs in React with Tailwind CSS, using AI tools like Figma Make, Claude and GitHub Copilot to ship faster from sketch to live product.

SKILLS

Design: Figma, Design Systems, UI/UX Design, Wireframing, Prototyping, Responsive Design
AI Design Tools: Figma Make, Claude Design, UX Pilot
Frontend Development: React, JavaScript, HTML, CSS, Tailwind CSS, ShadCN
AI Development Tools: Cursor, GitHub Copilot, v0 by Vercel, Claude AI
Other Tools: Git, GitHub, VS Code, Vercel, WordPress, Photoshop, Illustrator
Languages: English, Danish, Persian

SELECTED PROJECTS

MatchMe — AI-Powered Universal Matchmaking App *2025*

End-to-end UX/UI design of a service marketplace that uses AI to match users with babysitters, tutors, trainers, cleaners, handymen, and more based on personality, availability, location, and needs.

- Designed AI onboarding quiz that builds user preference profiles in under 2 minutes—no manual filters needed;
- Created transparent AI matching system with confidence scoring (0-100%) showing why each helper is recommended;
- Designed mood & personality matching feature where AI analyzes communication style compatibility;
- Built in-chat AI assistant to help users write first messages and suggest follow-up questions;
- Complete design system with 40+ components, auto-layout responsive patterns, color tokens, and typography scale;

DetectAI Security — AI Threat Detection & Human Verification Platform *2025*

Strategic UX/UI design of a SOC platform implementing Level 3 automation—where AI detects threats autonomously, and analysts verify outcomes before certification.

- Designed analyst certification flow with deliberate friction ensuring conscious human review without micromanagement;
- Created transparent automation patterns: confidence scores, attribution labels, and action timelines;
- Designed 7 core screens: Dashboard, Alert Triage, AI Transparency, Incident Detail, Playbook, AI Report, AI Controls;
- Built design system with dark theme for 24/7 SOC environment, status colors, and reusable components;
- Framed strategic design tension: AI needs to handle volume; analysts need proof of judgment applied;

AI Chatbot Application — Dual-Bot Chat Interface *2025*

Full-stack design and development of a conversational AI app with two distinct assistants: GPT-4o mini and personal bot for recruiters.

- Designed chat interface differentiating two AI assistants visually while maintaining unified layout;
- Built conversation-first UI with typing indicators, streaming responses, and immediate feedback;
- Implemented dual-mode chatbot: general AI (GPT-4o mini) and personal knowledge base (custom structured data);
- Full-stack monorepo: React frontend + Express backend + OpenAI API with server-side key management
- Custom REST API, routing, CORS config, and environment management built from scratch;

WORK EXPERIENCE

Freelance UI/UX Designer & Frontend Developer — Denmark *2023–Present*

- Design and build responsive web interfaces for personal and client projects
- Full design-to-code pipeline: Figma design → React components → deployed
- AI-augmented workflow using Cursor, GitHub Copilot, v0, and Figma Make

Product Designer — Glienke Design *2024*

- Optimized website responsiveness and resolved functionality issues
- Improved user experience and ensured accessibility compliance
- Achieved 12% increase in page views

UI/UX Designer, Web Developer — Mentor Jet —Remote

- Designed and built WordPress websites while self-teaching Figma; *2019–2021*

Web Developer — Pharmacy-Dr. Ahmadi— Iran *2012–2016*

- Maintained visual consistency across pages using custom CSS and design guideline;
- Improved user experience by simplifying navigation and page structure;

Calligraphy Artist *2014–Present*

- Trained eye for letterforms, spacing, and visual precision

EDUCATION & CERTIFICATIONS

UI Design — ReDI School, Denmark 2025
Masterclass: AI, Cybersecurity & UX — Visma e-conomic 2025
UX Design & Graphic Design — Itucation, Denmark 2024
Frontend Development — Roskilde Tekniske Skole 2021–2023
